Product description

Xylitol (birch sugar) - sweetening ingredient for modern recipes

Xylitol (birch sugar) is a practical B2B ingredient for professional assortments and production. It is useful in reduced-sugar desserts, drinks, breakfast products and confectionery. It offers a familiar sweet profile and can be used where classic sugar is not the desired choice.

Why choose this product?

Clear ingredient identity: easy to understand and communicate to customers.

Professional use: suitable for stores, cafés, bakeries, producers and HoReCa.

Recipe flexibility: can be used in multiple product concepts.

Convenient format: easy to portion and include in B2B processes.

Assortment value: helps build a wider premium Liovela offer.

Product description - cd.

How to...

Ingredients
